DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 1-17 in Paper No. 7 is acknowledged.
2. This application contains claims directed to the following patentably distinct species of the claimed invention:
 - a. Microelectronic device comprising a package core and a microelectronic die located within an opening in the package core, and a fiber reinforced encapsulation material within the opening as illustrated in fig. 3;
 - b. Microelectronic device comprising a microelectronic die mechanically coupled to a package substrate, and a fiber reinforced encapsulation material mechanically coupled to the microelectronic die to provide structural support as illustrated in figs. 9 and 10;
 - c. Microelectronic device comprising a microelectronic die attached to a first side of a flexible circuit board and a fiber reinforced encapsulation material to hold the microelectronic die to the flexible circuit board as shown in fig. 11.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ginette Peralta whose telephone number is (703)305-7722. The examiner can normally be reached on Monday to Friday 8:00 AM- 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wael Fahmy can be reached on (703)308-4918. The fax phone numbers for
